Asphalt Roller

STATIC PNEUMATIC TIRED ROLLER

10–15 tonne class static pneumatic tired roller for smooth finish and compaction on medium and large paving jobs.

Best Compaction Quality and Efficiency

- Pneumatic tires with uniform, high contact pressures and kneading effect achieve the target density.
- Wide tires overlap larger area (TS206 : 35mm, T2-3 : 55mm) so it would be great for asphalt pavement.
- Zero side clearance provides a full view of the tire edges for easy rolling along curbs and near buildings.
- Tilting mechanism of the front wheels provides continuous contact at all times on uneven surfaces for uniform compaction and a smooth finish.
- Pressurized water sprinkler system is standard to minimize pickup of hot mix asphalt (HMA) on tires.

Operators Comfort

- Fold-down awning is standard for easy transportation.
- Quiet and comfortable with low noise level.

High Safety Standards

- Five mirrors are standard safety equipment for good visibility.
- Flat floor and hand rail around the operator station protect operator against falling or tripping hazards.

Easy Maintenance

- Easy cleaning water tank with a large drain plug and sloped bottom.
- Water and release agent spray system with anti-clog package, i.e., triple-protection filtration, etc., and with perfect draining winterization.
- Water filter is easily cleaned by turning the lever. No need to change filters.
- Easy-access lubrication device for the drive chain is standard.

Standard Equipment :

- Instrument • Gauges • Back up alarm • Horn • AWNING
- Sliding seat • Head light • Working light • Turn signal lamp
- Mirrors • Pressurized water sprinkler system • METAL BALLAST (2t)
- Intermittent water spray timer • 4 points lifting • Cocomat

Optional Equipment :

- Deluxe seat • Rotary lamp • Road sprinkler system
- Release agent spray system
